EDUCATION

Sushant University

B.Tech CSE

Gurugram, Harayana

2021 – 2025

EXPERIENCE

Full Stack Developer Intern

Crescos LLC

June 2024 – Present

Baltimore, MD, USA

- Developed and deployed RESTful APIs, leading to a 20% improvement in system performance and scalability.
- Collaborated with cross-functional teams to design and implement scalable backend solutions, enhancing data handling efficiency by 30%.

Associate Data Analyst Intern

NeoDocto.Inc

Jan 2024 – Feb 2024

Remote

- Collected and analyzed data using Python and Excel, resulting in actionable insights that improved decision-making accuracy by 15%.
- Conducted exploratory data analysis and statistical analyses, which contributed to a 10% increase in data-driven strategic initiatives.
- Created and presented visualizations that effectively communicated insights, leading to a 20% improvement in stakeholder engagement and understanding.

PROJECTS

Veniti | React, Tailwind CSS, Axios, Prisma, JWT, PostgreSQL, Cloudflare Workers, Postman

- Developed a Medium clone using React and cloudflare workers with user authentication and CRUD functionality.
- Used Tailwind CSS for styling.
- Implemented PostgreSQL with Prisma ORM for database operations.
- Deployed on vercel and cloudflare workers for high availability.

Paytm Clone | MongoDB, JWT, bcrypt, React, Tailwind CSS, Express, Node.js, Postman for API testing

- Created a Paytm clone using React, Node.js, and Express.js, implementing features such as user authentication, transaction processing, and payment integration.
- Utilized Recoil for state management and Tailwind CSS for a responsive and modern UI.
- Leveraged MongoDB with mongoose for managing user data and transactions.

Netflix-Clone | React, Express, Node.js, MongoDB, JWT, bcrypt, TMDB API

- Developed a Netflix-like streaming application using the MERN stack, incorporating user authentication and dynamic movie recommendations. Implemented robust server-side logic for managing user data and handling requests efficiently.
- Integrated TMDB API to provide a comprehensive database of movie information, including titles, descriptions, and ratings.
- Utilized MongoDB for scalable and flexible database management, ensuring smooth performance and reliability.
- Implemented secure authentication with JWT and bcrypt to protect user accounts and sensitive data.

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres, MySQL), JavaScript, HTML/CSS, Typescript, NoSQL (Redis, MongoDB)

Frameworks: Node.js, Flask, Bootstrap, Tailwind CSS, Material-UI, RestAPI

Developer Tools: Git, Redux, Docker, AWS, CloudFlare, VS Code, PyCharm, IntelliJ, Eclipse

Libraries: Zod, axios, hono, React, pandas, NumPy, Matplotlib

CERTIFICATIONS

Live 0-100xdevs Cohort

Completed intensive training in modern web development through the 100xDevs cohort. Acquired expertise in full-stack application development, frontend frameworks, backend solutions, and collaborative project execution.

100xDevs
